

STRUSOFT – COMPANY OVERVIEW AND PRODUCTS

MARCH 2010

Structural Design Software in Europe AB (StruSoft) is a Swedish innovative software development company with more than 25 years of experience in specialized software applications for the building industry. The software includes the following main systems:

- ✓ **WIN-Statik**, a suite of powerful and easy to use applications for common design tasks such as columns, beams or frames.
- ✓ **FEM-Design**, an advanced 3D finite element software for analysis and design of complex concrete, steel and timber structures.
- ✓ **IMPACT Precast**, a BIM software for modeling and production of concrete precast elements. Based on an open database technology.
- ✓ **IMPACT Reinforcement**, a software based on AutoCAD for generating intelligent reinforcement drawings and reports for concrete structures.
- ✓ **VIP-Energy**, a suite of software covering the simulation of the entire building energy balance.

The software systems have been developed into well proven products, and are now used by more than 10,000 users at more than 1,000 customers in 20 countries around the world.

Many customers experience increased efficiency and productivity, time savings and increased quality when engineering buildings with StruSoft's software applications.

StruSoft is committed to continue the improvement of all products and to provide the best service and support to its customers. The head office is located in Malmö, Sweden, and there is a development center in Hungary (StruSoft Kft, Budapest). Sales offices are located in Malmö and Gothenburg (StruSoft AB). United Arab Emirates (StruSoft FZE) and United Kingdom (StruSoft UK).

StruSoft - Leader in engineering software systems including analysis, design, modelling and energy

StruSoft can provide you with the right tools to solve simple design tasks as well as complex three-dimensional structures.
